

# Determining Your Version of PowerTech Products

---

To determine which version of a PowerTech product you are using, display the product main menu and follow the instructions below. If you have any questions, please call PowerTech Technical Support.

## Authority Broker

1. Enter the following command on a command line: **LWRKAUTBKR**
2. From the menu that displays, select **option 5**, Configuration Menu.
3. On the next menu, select **option 21**, Product Version Information.

## Compliance Monitor

Compliance Monitor has three components. To determine the level of an individual component, display its main menu and do the following:

### **Consolidator**

Enter the following command to display the version:

**PTCMT2/PTPRDVRM 1PLCMT2**

### **Endpoint**

Enter the following command to display the version:

**PTCMT3/PTPRDVRM 1PLCMT3**

### **GUI Console**

1. From the main menu, select Help/About PowerTech Compliance Monitor.
2. Click Feature Details to see the version information.

## Network Security

1. Enter the following command on a command line: **WRKPTNS**
2. Enter the following command to the display the version: **LPRDVRM**

## Interact

1. Enter the following command on a command line: **DSPLIB PTINTERACT**
2. Verify whether the library PTINTERACT exists. If it does, you are using Interact 3.0.0. Otherwise, you are on a lower level.
